

## The Dawn of a New Era

### **TESCO's "SYMEX Americas, LLC" starts up the most efficient Vapor Recovery System on Earth!**

Think of words that express the feeling of a new and better technology. Words like:

- **Innovative**
- **Exciting**
- **Efficient**
- **Economical**
- **Cutting Edge**

These words and many others come to mind when we want to explain what makes any new technology stand out.

We use an analogy comparing computers. The first XP personal computer we used less than 15 years ago seemed like a miracle, at the time. But, when we compare that old XP (dinosaur) to the P4, 3+ gigahertz PC of today, the old XP seems old and obsolete. And it is! Now consider the 25+ year old vapor recovery technology still in service in terminals across the US. Like the XP, they have been made obsolete by the latest innovation vapor recovery technology, the **DRYVac™** Vapor Recovery System from SYMEX Americas. The biggest leap forward is the use of a very

special dry screw compressor. This very efficient machine, married with our brand new **ESP™** software, cuts system energy consumption by at least 30%. With power costs soaring, terminal owners can really sink their teeth into this saving! "The old machine never shut off," says one satisfied **DRYVac™** client. "Our new **DRYVac™** compressors ran only two hours all last Sunday ... two hours! We are really glad we upgraded."

If you are interested in modernizing your vapor control system you can call **TESCO** toll free to learn more. Simply dial **1-800-276-7152** from 8-5 eastern time Monday through Friday.

### **TESCO's People Make the Difference!**

"We recently reorganized. I felt we needed to give our people more of what they want," says **Tim Hammond**, **TESCO's** president and owner. "Times change, people change, the industry changes, and we intend to keep pace!" **TESCO** was founded with a focus on maintaining terminal vapor control systems. For years it did a good job! But the industry shifted towards self-maintenance and cost

*(Continued from page 1)*

**cutting. We still maintain our focus on terminals, but we're shifting the company towards greater diversification.**

**Today, we are a *more technical team*. We perform rack upgrades, sell and service additive and blending packages, manufacture safety and emissions monitoring systems, write custom software, sell and manufacture complete vapor control systems, and sell and install wireless data communications systems.**

**To learn more about TESCO and SYMEX Americas, please visit our websites, or call us toll free at 1-800-276-7152.**

## **The Dawn of a New Technology**

**This dawn picture of our latest DRYVac™ system is beautiful! The speck of white is the moon, and below it is Venus! When you see a**

**DRYVac™ system for the first time, your first impression will probably be, "WOW!" It's smaller, simpler, cleaner, and can process more with far less energy. So, if you're planning to upgrade or retrofit, let us show you how DRYVac™ can work for you!**
