Make it happen!
2010

HEX-B is coming. We can help you get ready!!

Did you know that the deadline for the EPA's new **40 CFR 63** is rapidly approaching... and do you know what it means to you?

In a nutshell it means that soon you will have to monitor and report the performance of your vapor emission control system. Subpart BBBBBB (six "B"s created the acronym "HEX-B") of this regulation states the many new requirements, and your options for complying ... all by 1/10/2011. That sounds like a long way off, but it will be here before you know it.

So, it's time to decide how you're going to deal with HEX-B. If you wait much longer, the deadline will pass you by! That wouldn't be good!!

We've done our homework. We have our designs in the can. They're proven technologies ... your way! If you decide the minimalist approach is right for you, we are here to help. If you want a fully automated system integrated into your SCADA system, that's right up our alley too! We're ready to help whenever you're ready.

HEX-B isn't a mystery, though it truly reads like one. If you're having trouble figuring it out, and trying to decide what you're going to do, just call Art Hilton. He's our "go-to" guy for HEX-B, and he can help you make the right decisions for your company and your terminal. You can reach Art at 317-658-8466.

HEX-B Compliance ... Ready?

Whether you have a Vapor Combustor ...

... or a Vapor Recovery System

HEX-B applies to you!!

With the deadline set at 1/10/11, this is the time to budget for it.

We're just a phone call away! Call us toll free at 800-276-7152, or direct at 317-872-4321. We're making it happen!
